Feature limitations

There is a set of features that are not yet available on the new Enterprise instance:

Currently unavailable features

The following features are currently unavailable on GHE.com, but may be planned for future development.

	Feature	Details	More information	Alternative
1	Copilot Metrics API	Currently unavailable.	REST API endpoints for Copilot metrics	
2	GitHub Codespaces	Currently unavailable.	Quickstart for GitHub Codespaces	Applications like Eclipse, Coder...
3	macOS runners for GitHub Actions	Currently unavailable.	GitHub-hosted runners	Possibly used by Mobile App team. Alternative to keep pipelines in Azure DevOps
4	Maven and Gradle support for GitHub Packages	Currently unavailable.	Working with the Apache Maven registry	Check with Data team. Do we need this at all and not the solution in Azure?
5	Spark	Currently unavailable.	About GitHub Spark	Check with Data team. Probably not needed. Double check
6	GitHub Marketplace	GitHub Marketplace, as a means of searching for, purchasing, and directly installing apps and actions, is unavailable. Ecosystem apps and actions can still be discovered and installed from their source, but they may require modification to work on GHE.com.	GitHub Actions workflows from GitHub Marketplace	Research
7	Certain features of GitHub Connect	Although you can connect an enterprise on GHE.com to a GitHub Enterprise Server instance, certain features of GitHub Connect are not available, including resolution of actions from GitHub.com.	GitHub Connect	N/A

| 8 | Some features currently in public preview or private preview | Certain features that are in a preview phase on GitHub.com may not be available on GHE.com until GA. | | |

Permanently unavailable features

By design, the following features are permanently unavailable on GHE.com. This is generally because they are not intended for large enterprises with strict compliance requirements.

	≡ Feature	≡ Details	≡ More information
1	Features unavailable with Enterprise Managed Users	Because Enterprise Managed Users is the only option for identity management on GHE.com, features that are unavailable with Enterprise Managed Users on GitHub.com are also unavailable on GHE.com. Notably, these include gists and public repositories.	Abilities and restrictions of managed user accounts
2	GitHub Importer (the "Import repository" button on GitHub.com)	Instead, the **GitHub Enterprise Importer** is available to migrate data. See About GitHub Enterprise Importer.	About GitHub Importe
